

# IS FLINT THE TIP OF THE ICEBERG?

Safe water for every household must be part of America's Water Future. We all need to know where our water comes from, what's done to treat it and how it reaches our homes. Visit [americaswaterfuture.org](http://americaswaterfuture.org) to learn how to support water education and awareness where you live.

America's Water Future is a campaign of the Project WET Foundation, a 501(c)(3) nonprofit organization (TIN: 20-0281441).
