

# IS YOUR FISH ON DRUGS?

Concerns about pharmaceuticals in water are part of America's Water Future. Prescription medications have been found in streams and lakes throughout the United States. Water education encourages actions such as prescription take-backs that reduce water contamination. Visit [americaswaterfuture.org](http://americaswaterfuture.org) to learn how to support water education and awareness where you live.

America's Water Future is a campaign of the Project WET Foundation, a 501(c)(3) nonprofit organization (TIN: 20-0281441).
