**Project WET Climate, Water  
and Resilience**

**Workshop will be held at the Annual LEEF Conference at the Fl. Elks Youth Camp, Umatilla on April 1 to 3, 2022.**

# Project WET K-12 Workshop Let's get **WET!**

Join us for an exciting workshop about water science and be certified as a Project WET Educator! Formal and non-formal educators are welcome! Project WET envisions a world in which action-oriented education enables every child to understand and value water, ensuring a sustainable future.

These hands-on, STEM-friendly activities are interdisciplinary and challenge students with science, engineering, social studies, English and math concepts. Activities are correlated to education standards.

All participants will receive

- Six hours of instruction
- Project WET 2.0 guides full of teacher-tested, innovative activities
- Other environmental materials

May qualify for in-service credit, but should contact your local in-service coordinator before the workshop. This workshop will meet all Florida in-service requirements.

Depending on Covid infections rates, this workshop may be converted to a virtual workshop. You will be informed in advance of any change and given the chance to attend or cancel with a refund.

Sponsored and conducted by
